

Congratulations on purchasing Ezi-Grip II to carry your valued bicycles. We are sure you will get many years of enjoyable use from your Ezi-Grip II. These racks are manufactured from high-grade materials and have undergone rigorous testing making them one of the best available on the market. Testing included a one million-cycle load test to ensure the rack can perform in excess of the desired loads and lifecycle expectations.

**NOTE:** Ezi- Grip bike racks are designed to fit most European style towbars. However there are numerous different styles of towbars and it is the vehicle owner's responsibility to ensure the correct fitment.

## **!! ASSEMBLE THE RISER TUBE BEFORE THE HANGER TUBE !!**

NZ Models: 7990C, 7996C, 7994C, 7997C, 7998C, 7999C

### **ASSEMBLY OF EUROPEAN STYLE "GOOSENECK" TOWBAR RISER TUBE**

- 1) Remove the grub screws and 8mm Allen key from the plastic bag.
- 2) **Note:** Note European style gooseneck bike racks have 3 grub screws
- 3) Dab a small amount of grease on the beginning of the thread/s, this will aid tightening against the towball and lubricate the threads.
- 4) Insert grub screws into the round nut/s at the base of the riser tube.
- 5) Place the riser tube onto the towball and tighten grub screws. It is important to ensure the grub screws are tightly fastened onto the ball. Lightly greasing the threads from time-to-time, between using your rack, will make this easier.  
NOTE: This tube must be vertical at all times.
- 6) Rock the rack while pushing on the Allen key with your foot to ensure it is seated correctly. Taking care not to bend the Allen key.

YOU ARE NOW READY TO INSTALL THE HANGER TUBE AND CLAMPS TO THE RISER TUBE. REFER TO THE SEPARATE INSTRUCTIONS PROVIDED WITH THE HANGER TUBE ASSEMBLY

### **!!! IMPORTANT SAFETY INFORMATION !!!**

- **MAXIMUM LOAD 75kg**

This tube must be vertical at all times. A flexing, bent towbar or loose rack could cause this tube to bend. Use trunk strap Pt No: 7149 if your towbar flexes. Remember to rock the riser tube while firmly tightening the Allen screw/s. Periodically check tightness of rack

**WARNING:** We recommend using trunk strap Part No: 7149 on all Ezi Grip racks

To accompany 7191C, 7057C, 7977C

## EUROPEAN STYLE RISER TUBES

European towbars have a different mounting point to most NZ towbars. The "Goose Neck" style requires firmer anchoring so EziGrip II have added extra support by using three grub screws to lock the riser firmly in place on the towball.

**WARNING:** We recommend using trunk strap Part No: 7149 on all Ezi Grip racks
